ABOUT ME

I enjoy facing new challenges and I am always eager to improve my skills and happy to learn new things. I would love to be part of a friendly and collaborative team, where we all can learn from each other and develop a great sustainable and scalable product. I have always been attracted to web technologies, that is why I have focused my career on web development after my previous experience in Industrial Design. I feel comfortable in multicultural environments as learning about other cultures is one of my passions and one of the reasons why I came to live in Barcelona. As a designer I can relate better to the front-end of web-development, but I am interested in being able to manage the back end as well.

CAREER HISTORY

Full Stack Developer - ADMIRA DIGITAL NETWORKS | SEP 2019-PRESENT

- Development of new features for the main product of the company, which is a content manager used to distribute digital contents among our clients' digital players/ screens.
